

MOUNTAIN LAKE BIOLOGICAL STATION SUMMER FIELD COURSES 1991

The Mountain Lake Biological Station offers a summer program of study and research in environment and evolutionary biology. Situated at an elevation of 4,000 feet in the Allegheny Mountains of southwestern Virginia, the station draws faculty and students from across the nation. Students may pursue the master's degree in biology by summer study, a program that is particularly suitable for teachers in secondary education.

FIRST TERM - June 9 - July 13

Course Title	Instructor	Home Institution
Mammalogy	Jack A. Cranford Assoc. Prof. of Biology	VPI & SU
Animal Behavior	Robert G. Jaeger Professor of Biology	Univ. of SW Louisiana
Ecological Genetics	David A. West Assoc. Prof. of Zoology	VPI & SU

SECOND TERM - July 14 - August 17

Plant Taxonomy	Spencer Tomb Assoc. Prof. of Biology	Kansas State University
Community Ecology	Joseph Travis Professor of Biology Mark A. McPeck Post-doctoral Assoc.	Florida State University Archbold Biological Station
Whorkshop in Electrophoresis July 14 - 27	Charles R. Werth Asst. Prof. of Biology	Texas Tech University
Workshop in Molecular Techniques for Field Biology July 28 - August 17	Michael P. Timko Asst. Prof of Biology Daniel J. Burke Asst. Prof. of Biology	University of Virginia University of Virginia
Scholarships :	Service awards for students covering room and board costs. Scholarships which provide financial assistance. Post-Doctoral Research Awards (10 weeks)	
Further Information:	Director, Mountain Lake Biological Station Gilmer Hall, University of Virginia Charlottesville, VA 22901
